Power Wash

Degreaser / Cleaner

Power Wash is an industrial chemical type cleaner that attacks the molecular structure of soil, thereby destroying it's adhesive qualities and emulsifies the soil which then is wiped or rinsed away.

Power Wash is a safe and economical cleaner / degreaser that quickly emulsifies animal fat, vegetable oil, petroleum oils and greases in industrial areas. It is free rinsing, non-flammable and non-corrosive to metals.

Power Wash is a effective degreaser and bug remover in car wash applications. May also be used on toilet tanks, tubs, tiles, sinks, floors, walls and composition tile.

DIRECTIONS FOR USE:

Apply Power Wash with pressure wash equipment, spray bottle or mop.

Power Wash may be used full strength or diluted to a ratio of 1 part Power Wash to 30 parts water.

Dilution will depend on amount of soil build up to be removed.

Apply **Power Wash** directly to surface to be cleaned, allow a few minutes to penetrate, agitate if necessary.

Rinse surfaces thoroughly with warm water.

PACKAGING AVAILABILITY:

205 Liters

PHYSICAL PROPERTIES:

Type: Liquid

Color: Blue

Odor: Slightly pungent
